EDUCATION

University of Bristol

PhD in Human Geography

Bristol, UK

Oct. 2020 – Nov. 2024

University of Sheffield

MSc (Distinction) in Applied GIS

Sheffield, UK

Sep. 2017 – Sep. 2018

University of Lincoln

BA (Hons), 2:1, in International Relations

Lincoln, UK

Sep. 2012 – May 2016

Ghent University

Erasmus Programme

Ghent, Belgium

Sep. 2014 – Feb. 2015

EXPERIENCE

Teacher

University of Bristol

Oct. 2020 – May 2025

Bristol, UK

- Designed and lead lectures for *Understanding Global Problems Using Data* unit, teaching quantitative analysis.
- Conducted Political Geography workshops for widening participation initiatives.
- Lead seminars across geographic sub-disciplines: political, economic, urban, and health geographies.
- Provided academic guidance and mentorship for student development.

Research Associate

University of Bristol

Apr. 2023 – Sep. 2023 & Jun. 2024 – Dec. 2024

Bristol, UK

- Developed Net-Zero Vulnerability Index, ranking UK areas by vulnerability to green economic restructuring.
- Contributed to public reports, academic articles, and built interactive websites for policy engagement.
- Analysed Bristol's rental housing energy efficiency and created an interactive webmap and report.

UKRI Policy Intern

UK Home Office, Central Analysis and Insights Team

Jun. 2022 – Sep. 2022

London, UK

- Led analytical initiatives in data visualisation, spatial analysis, and communication for non-experts.
- Enhanced literature review methodology with dashboard-driven system for multi-user review.
- Managed projects, upskilled team members, and mentored junior interns.
- Consulted on evaluative survey redesign aligned with customer needs.

GIS Consultant

DEMOS

Apr. 2023 – May 2023

London, UK

- I produced all maps included in the 2023 Good Credit Index Report.

PROJECTS

Net Zero Resilience Index | R, Leaflet, Github, QGIS, HTML/CSS

Jun. 2024 – Dec. 2024

- Developed an economic complexity method utilising machine learning to analyse employment in the UK.
- Created a ranked resilience index for net-zero economic transition.
- Visualised and published index map via GitHub Pages.
- Authored detailed report and journal article (under review).

PhD Thesis | R, QGIS, SQL, LaTeX

Sep. 2020 – Nov. 2024

- Authored 58,000 word peer-reviewed thesis.
- Uses large surveys and local economic data with statistical models to analyse voting behaviour.
- Utilised machine learning, mixed-effects models, and descriptive statistics.
- Effectively balanced teaching, research projects, upskilling, and internships.
